In this post we'll learn how to use Photoshop Elements to edit and create images. This guide will teach you how to select image elements, resize, crop, add Photoshop's many special effects, add text and then export your images for use online. To follow along, you'll need a high-quality photo of your choice. If you're new to Photoshop Elements, have a look at the free tutorials at Adobe's website: How to select and edit an image in Photoshop Elements Most edits done in Photoshop Elements are similar to the ones made in Photoshop. First, open the image you wish to edit in the Photoshop Elements Editor. Next, select the images you want to edit by using the following methods: Hit F6 and use the Select Top left option to select the top left portion of the image. Or, click the Selection tab in the main editor window and select the image you want to edit. Alternatively, use the powerful selection tool. Click the tool in the tools panel to select the objects you want to edit. It's available in this picture: Your first basic change you can make is to resize the image. To do so, click the Resize menu and choose the size you want to resize to. The exact size you'll need depends on your intended use of the image and is something you'll need to decide yourself. For example, for the image in the preview window you could choose a size that fits well into your social media timelines. Using the Resize tool, you can also change the orientation of the image by clicking the Resize menu and choosing Rotate. Adding an image over top of another is super simple. Just select the layer you want the image to be over, move it onto the layer you want to use for the image, and then drag the layer you want to use for the image onto the layer you want it over. This is the image after adding it over top of the layer you want to use: This is an example where you can add text to the image in Photoshop Elements. At this stage, we'll only be adding text to the 'diploma' layer, but for the rest of this tutorial, we'll be replacing the texts in the 'diploma' layer with a stylised text effect. To add text, click the tool in the Tools panel to select the text tool. You'll see the following picture in the menu bar, which you can also click 05a79cecff
