This invention relates to a new agricultural machine and a new method of making an agricultural machine with a bottomless discharge hopper. 2. Prior Art
Statement It is known to provide an agricultural machine that is adapted to be drawn by a tractor and that has an open topped hopper that is carried on the
machine and that has a bottom wall that closes the hopper when the machine is drawn through the ground from behind the tractor, and it is known to provide
bottomless discharge hoppers for an agricultural machine that closes the hopper when the machine is drawn through the ground from behind the tractor. For
example, see the following two items: (1) Patent Application Publication US 2010/0278532 A1. (2) Patent Application Publication US 2011/0028585 A1. It appears
that the devices of item (1) have a bottom wall that is carried on the machine with the bottom wall being part of the bottom wall that closes the hopper. It
appears that the devices of item (2) do not have a bottom wall carried with the device and the device closes the hopper by a bottom wall that is carried on the
tractor. It appears that these two items to this invention differ from each other in construction and mode of operation. It is known 6d1f23a050
